

High Efficiency Generation 2

- 💧 Our most advanced, highest efficiency water softener
- 💧 Smart display with the patented W.E.T. system monitors system performance
- 💧 21 day variable reserve accurately tracks & predicts daily water use
- 💧 Counter-current regeneration improves system performance & efficiency
- 💧 Soft water brining adds years of trouble free service
- 💧 Precise proportional brining and proportional regeneration optimize performance by using only the exact amount of salt and water you need, when you need it
- 💧 High 1" flow rates sustain household water pressure, even with multiple users
- 💧 Super capacitor and lithium battery backup protect system settings from power failure
- 💧 9 fully programmable cycles provide flexibility to treat a wide range of water problems
- 💧 Diagnostic abilities second to none
- 💧 7 year warranty on the valve & all parts, lifetime warranty on both tanks
- 💧 Can be customized and sized to fit your family's needs

High Efficiency Generation 2 Series

Provides Automatic, Efficient Water Conditioning

Unlike conventional downflow water conditioners that do not fully regenerate the ion-exchange bed, the High Efficiency system uses counter-current regeneration, which allows the water leaving the tank to pass through the most highly conditioned zone in the ion-exchange bed. This ensures maximum efficiency and consistent conditioned water quality. Efficient conditioners will save you money, and help the environment.

Commers ~ Quality Water Systems since 1947 ~ Office (763) 252-7701 ~ Fax (763) 252-7739

Performance & Convenience

The Commers Highest Efficiency Series offers years of trouble free performance on even the hardest of water. With W.E.T. system, our Smart Display monitors system performance and alerts the user to system status. Our precise proportional brining and proportional regeneration optimize performance & save you big on salt & water. Plus, with soft water brining and counter current regeneration keeping the internal parts vital to the proper operation of the system free from the wear and tear of hard water, you'll enjoy the benefits of soft water for many years to come!

Water Usage - Previous 21 Days

Prevent Salt Depletion with a Salt Monitor

Our salt monitor tests the brine every cleaning cycle. When levels are low, an alarm reminds you to add salt.

Locally Manufactured Since 1947

- 💧 Manufactured in Blaine, Minnesota by Commers Water
- 💧 Convenient showrooms in Blaine, Golden Valley and Burnsville
- 💧 Customized equipment to cure your water problems
- 💧 Up to 32 different media available to solve any challenge
- 💧 24 hour emergency service
- 💧 Commers professional technicians handle all of our installation and service
- 💧 Members of the BBB, National Water Quality Association and Minnesota Water Quality Association
