

## Choose the Whole House System

- Whole House solution for all of your water problems
- Softens household water using minimal salt & water
- Remove unwanted chlorine & chemical contaminants throughout the home
- Fully programmable back flush eliminates "channeling" while minimizing water use
- The 1" valve provides high flow rates to sustain household water pressure, even with multiple users.
- Counter current regeneration improves system performance & efficiency
- Dynamic variable reserve feature accurately tracks and predicts your family's water use patterns & adjusts to changing demands
- Super capacitor and lithium battery backup protect system settings from power failure
- 7 year warranty on the valve & all parts, lifetime warranty on all 3 tanks
- Can be customized and sized to fit your family's needs

## The Commers Whole House System

### The Best Water For Your Family

The Commers Whole House System delivers soft, conditioned, chlorine and chemical free water to every tap, tub and shower throughout the home. Your home is protected from the scaling, mineral deposits, and service problems caused by hard water, and your family is protected from potential health hazards associated with chlorine and other chemicals. The System reduces irritation, rashes, and possible health risks due to the absorption of harmful chemicals through your skin, while also protecting against the inhalation of chemical vapors in the shower. With the Commers Whole House System, you can enjoy clean, filtered, chemical free water everywhere in your home!

The Commers Whole House System effectively reduces or removes:

- |                |                                   |
|----------------|-----------------------------------|
| Water Hardness | Volatile Organic Compounds (VOCs) |
| Iron           | Perfluorochemicals (PFCs)         |
| Chlorine       | Trihalomethanes (TCM)             |
| Herbicides     | Trichlorethylene (TCE)            |
| Pesticides     | Unpleasant Taste & Odor           |

Commers ~ Quality Water Systems since 1947 ~ Office (763) 252-7701 ~ Fax (763) 252-7739

### Water quality when you need it!

Water Usage - Previous 21 Days

## Performance & Convenience

The Commers system's patented microprocessor keeps a running average of the previous 21 days' water usage and automatically adjusts the conditioned water reserve higher or lower as required. This ensures maximum efficiency and consistent conditioned water quality that your family can depend on when you need it. An efficient water conditioner saves you money, saves on salt, uses less water and helps protect the environment.

## Commers The Water Company From Our Family To Yours!
