

Commers HE Series

Unlike conventional downflow water conditioners that do not fully regenerate the ion-exchange bed, the High Efficiency system uses counter-current regeneration, which allows the water leaving the tank to pass through the most highly conditioned zone in the ion-exchange bed. This ensures maximum efficiency and consistent conditioned water quality. Efficient conditioners will save you money, and help the environment.

- High Efficiency regeneration saves on salt & water usage
- 21 day variable reserve accurately tracks and predicts daily water use
- Counter-current regeneration improves system performance & efficiency
- Soft water brining adds years of trouble free service
- High Performance 1" control valve & distributor ensure maximum water flow
- Super capacitor and lithium battery backup protect system settings from power failure
- 9 fully programmable cycles provide flexibility to treat a wide range of water problems
- Diagnostic capabilities second to none
- Lifetime warranty on both tanks, five year warranty on the valve & all parts
- Can be customized and sized to fit your family's needs

Performance & Convenience

The Commers High Efficiency Series offers years of trouble free performance on even the hardest of water. The system's patented microprocessor keeps a running average of the previous 21 days' water usage and automatically adjusts the conditioned water reserved higher or lower as required, ensuring you quality water when you need it. And with soft water brining keeping internal parts vital to the proper operation of the system free from the wear and tear of hard water, you'll enjoy the benefits of soft water for many years to come!

Water Usage - Previous 21 Days

Your Minnesota Water Treatment Experts

Commers Water Company offers a full range of water treatment including water purification and filtration. Commers has been working with purification and drinking water concerns for over forty years, long before drinking water was a national concern. Commers invented its first drinking water system in 1978 and was the first to bring these types of systems to Minnesota. In a continuing effort to pioneer the drinking water field, Commers began to work with a new technology called reverse osmosis in 1980. Working closely with the inventor of residential reverse osmosis drinking systems for over twenty years, Commers Water has more experience with drinking water systems and water purification than any other dealer in the State of Minnesota.

From Our Family To Yours!

- Manufactured in Blaine, Minnesota by Commers Water
- Convenient showrooms in Blaine, Golden Valley and Burnsville
- Customized equipment to cure your water problems
- Up to 32 different media available to solve any challenge
- 24 hour emergency service
- Commers professional technicians handle all of our installation and service
- Members of the BBB, National Water Quality Association and
- Minnesota Water Quality Association

Commers: Your family owned Minnesota water treatment experts.

Manufacturer of customized water treatment products for the Twin Cities since 1947.
